Autism Services and *Connected Support*

We are a specialist residential and supported living provider for people on the autism spectrum. Our focus is to enable people to work towards their goals, live more independently and take control of their lives.

By listening to each person we aim to understand what they would like to achieve in life. We then work closely with them, their family, circle of support and other professionals to define goals and work together to achieve them.

Through our outcome focussed approach, we provide support that is built around each person's specific and complex needs.

Keys **Connected Support** provides a national network of **Care, Education and Health** services for children, young people and adults, seamlessly connecting specialist schools, alternative learning solutions, children's homes, adult residential, supported living and neurodevelopment services.

We start with the individual, connecting the right expertise and the right service to each person. There are no predetermined pathways. Sometimes this means support from one service, sometimes it means many services working together.

What matters is that our support is centred on the individual, building personalised, flexible and **Connected Support**.

Our Support

We deliver expert, person-centred care designed to help autistic individuals thrive, build confidence, and achieve their personal goals. By listening closely to each person and their support networks, we co-create a tailored Autism Profile. This collaborative approach fosters self-awareness, celebrates unique strengths, and actively reduces daily challenges to enhance overall wellbeing and self-worth.

Our highly trained staff work alongside a multidisciplinary team—including an Autism Advisor, Communication Development Workers, Psychologists, Clinical Support Nurses, and Behavioural Advisors—to provide comprehensive, informed care. We also understand that change can cause anxiety, so we create robust, visual transition plans to ensure every individual feels safe, comfortable, and welcome.

Guided by dedicated Key Workers, we support individuals to identify their aspirations and develop practical life skills. **Our targeted assistance includes:**

- + **Goal Achievement:** Navigating social norms, body language, and facial expressions using social stories.
- + **Education & Employment:** Accessing college courses and finding meaningful job opportunities.
- + **Independent Living:** Mastering budgeting, shopping, food preparation, and daily self-care.

Person Centred Planning

Our staff work closely with each person to build a custom, person-centred plan based on their unique Autism profile.

Using a variety of accessible communication tools, we ensure every individual stays in control of how they want to live their life today and in the future. We provide practical, hands-on support to turn these personal plans into reality.

This includes helping people gain independence through travel training, money management, and personal care, while also coordinating medication and health appointments. Beyond daily essentials, we focus on helping individuals thrive by exploring new hobbies, expanding their social circles, and unlocking training or work experience that taps into their unique personal interests.

Autism Friendly Interventions

- + Using clear and unambiguous language
- + Giving structure to a meaningful day meaningful to the individual
- + Offering visual support to aid communication
- + Social stories to gain a perspective on how other people think
- + Regular exercise as part of a positive predictable routine
- + Support for sensory processing differences and difficulties
